- Tools: Git, Bash, Eclipse

Familiar with:

- Languages: Python, Haskell, Prolog, JavaScript, C, HTML, CSS, SQL
- Frameworks: Jekyll
- OS: Ubuntu
- Tools: Android Studio, Sublime
- Data structures and Algorithms

Personal Projects

redditNews, Python

- A simple python Script used to take the current top rated [reddit.com/r/worldnews](https://www.reddit.com/r/worldnews) articles, and parse the links and titles to a text document using lxml and requests libraries.
- This was created to allow users unfamiliar with reddit to be able to view popular world news.
- Currently has a few bugs due to server unreliability and reddit code inconsistency.

Queen's Global Energy Conference website

- A conference website used for the 2015 Queen's Global Energy Conference
- Made using a bootstrap framework with supplementary HTML, CSS and JS.
- Used to attract potential sponsors and speakers while updating conference information
- Being updated as deemed necessary, but can be viewed at www.qgec.ca

Extracurriculars

Director of IT - Queens Global Energy Conference

2015-Present

- Designer and creator of the conference website, which is used to help attract sponsors, speakers and delegates for the event.
- Managing all technology related events for the conference

Director of Marketing - Queen's Code the Change

2014-2015

- Managed the advertising side of the Code Jam
- Worked in a team to brainstorm and collaborate ideas to run a successful, 90 student Code Jam (Hackathon)

Job experience

Queen's University Residence Don

2015-Present

- Helping to overlook the transition of over 200 first year students into residence
- Assisted students with studying for classes and exams

Education

Queen's University

2013-2017

- Candidate for Bachelor of Computing
- Specialization: Computer Science
